- **Heart and Lung organ transport systems**

41st Annual Scientific
Meeting
21-23 November 2024
Te Pae Convention Centre
Christchurch, New Zealand

Visit: www.anzcp.org

Dr O'Loughlin is a consultant Cardiothoracic Anaesthetist at Te Toka Tumai, Auckland Hospital. She is also the current Clinical Lead for the Heart and Lung Transplantation program.

In 2023 she spent a four-month sabbatical in some of the world's largest and most prominent transplant centres. The focus of this trip was intra-operative ECMO for lung transplantation, DCD heart transplantation, and transport devices for donor organs.

In addition to her transplant work Jaime has interests in trainee education and welfare; and in the debriefing of critical events.
