

# SIMULATION WORKSHOPS

Session Details Here

### WORKSHOP SIMULATIONS

**ANZCP Members receive this workshop at the member rate of \$50.00 AUD**

**(Non Members \$220.00 AUD)**

**Wednesday 19<sup>th</sup> November**

**9–11am 12–2pm 3–5pm**

**Cardiopulmonary Bypass (CPB) Simulation (CPB) Workshop**

**Extracorporeal Membrane Oxygenation (ECMO) Simulation Workshop**

Simulation is often described as where an individual is placed in a "foreign" environment with equipment they have never seen, facing a situation never experienced, surrounded by people who are not helping. This workshop will offer a hands-on, experiential learning situation where participants can practice skills and decision-making in a safe, simulated environment, mirroring real-life scenarios. This allows participants to develop confidence and competence. Group discussions after each scenario where the interaction between instructors and participants highlight there is more than one way to deal with any perfusion issue and we all end up learning from one another, improves teamwork and communication skills. And those of you who have been practicing for many years and have 'seen it all' – we would like to challenge you that you haven't. Over the years we have developed a couple of rules that we ask all attendees to follow during the day:

- What happens in simulation stays in simulation – the only person who judges your performance is you!
- Have fun and learn – Relax in a non-threatening environment.
- Participate – Be prepared to give your opinions and knowledge "No wallflowers allowed".

Participation ensures CPD points: Knowledge and skills – short format learning – 2 hours
